PROFILE

Passionate software engineering student with a background as an ex-military artillery officer. Strong managerial and interpersonal skills with a mission-driven, independent work ethic. Proficient in Python, JS, CSS, HTML, C, C++, and C#, as well as frameworks such as Django, Node.js, .NET, WPF, Winforms, SQLite, and AWS. Solid understanding of OOP principles, data structures, debugging, and testing.

MAIN PROJECTS;

Academic digital stock management platform

Developed an academic inventory management platform.

- Python, HTML, CSS, JavaScript, and Django web framework.
- Multiple user type support with access control. Each with a tailored interface and varying permissions for borrowing and ordering equipment.
- Analyzing inventory information, and managing user access.
- Connected to both local and Cloud based SQLite server (AWS)

Affiliate marketing report system

Developed PDF reports based on data from AliExpress's REST API.

- FPDF, Networking, Date, MD5
- Networking with pagination
- Multiple sorting, filtering and UI formatting to match business needs

BACKGROUND

Army , Officer on artillery corps

Commanded a system of 100 soldiers and commanders. Experienced in time management, prioritizing tasks, dealing with challenges and dealing in a complex environment.
